

Allsop Home & Garden's Recycled Glass Solar Garden Art

Congratulations on the purchase of your Recycled Glass Solar Garden Art!

Part List:

- 1.) Hand blown Recycled Glass globe
- 2.) Brushed Steel Planting Stake
- 3.) Solar Panel (attached to stake)
- 4.) On/Off switch
- 5.) High Powered LED light
- 6.) One AA Ni-MH rechargeable battery (included)

Assembling your Recycled Glass Solar Garden Art can be accomplished in just 3 steps:

Step 1: Locate the On/Off toggle switch on the bottom side of the solar housing compartment that is attached to the stake. Move the toggle switch over to the "ON" position. This will activate the AA rechargeable battery located (and included) inside of the solar housing compartment. Leave the On/Off switch in the "ON" position at all times for daily recharging of the battery by the solar panel.

Step 2: Attach the hand blown Recycled Glass top to the planting stake. Carefully, with one hand on the planting stake, screw the glass globe clock-wise onto the planting stake so that the globe is fixed securely to the stake and the LED is completely inside of the Recycled Glass globe.

Step 3: Plant your Recycled Glass Solar Garden Art into the ground by using two hands and firmly pushing into the dirt. Rotate the solar panel on the stake so that it is facing upwards towards the sun. Make sure to select a location where the solar panel will receive at least 4-6 hours of direct sunlight. Be sure to remove the thin clear plastic protective cover located on top of the solar panel.

The Recycled Glass Solar Garden Art is now completely assembled and will automatically turn itself on and glow every night. If you find your product doesn't glow on the first night please allow 2-3 days of charging in direct sunlight.
